Stellar Updates

Recent changes and updates to Stellar:

Electronic Claims

Some carriers and/or clearinghouses refuse claims with a message loop 2310B, PRV not required. A change has been made so that choosing format style EDS, tax type EIN or SSN and no group number meets that need.

Paper Claims

A change to use non-allowed part of services as Paid Amount in box 29 is now available. Special setup – call support for info.

A problem which repeated the first digit of Units, box 24g has been fixed. This caused 10 units to print as 110, etc.

The box 32 zip code will now print nine digit format.

Patients Quick Notes

Improved copy and paste function so that a warning is given to save the note after pasting.

Patient Billing

Problem with Minimum Due when using Family Billing option has been fixed.

When using the insurance type of lawyer (LW), the lawyer's name will now print.

Appointments

The 'Multi' appointments button could occasionally crash Stellar. An invalid date could also do this. Fixed.

Summaries

Daily/Monthly/Yearly Summaries have been improved to run faster from remote workstations.

Why Vaccinate?

"All great truths begin as blasphemies."--George Bernard Shaw.

Smallpox:

England was one of the first countries to mandate smallpox vaccination. The penalties were severe - loss of property and jail. Still, many parents refused to vaccinate themselves and their children.

Then a few brave scientists released studies questioning the efficacy of vaccines. It took nearly 20 years to get the law repealed (1919). In a population of 40,000,000 people the deaths from smallpox promptly dropped from 44,000 to 28 per year. <http://tinyurl.com/65fzy3> Must Read!

Polio:

The sickness and paralysis that came to be known as 'polio' was unknown prior to the widespread use of insecticides and herbicides. The first onslaught of cases occurred when the Army's stores of Monsanto DDT were promoted and sold to the public after WWII. Yet the medical/drug establishment searched feverishly for bacteria and viruses. On April 12 1955 Salk announced successful testing of a polio vaccine. A huge investment in PR, including endorsement by President Eisenhower. Vaccinations began immediately. Within weeks, medical authorities were inundated with reports of children stricken with polio. The damage control team went into action. By manipulating the statistics and reclassifying the symptoms, polio epidemic was

miraculously over. The coverup (and profits) continue today while millions of new victims are told they have Acute Flaccid Paralysis (AFP), aseptic meningitis, Guillain-Barré, or now, West Nile virus (WNV).

Hoax:

Searching for children who had not been exposed to mercury in vaccines -- the kind of population that scientists typically use as a "control" in experiments -- Dan Olmsted, former UPI reporter, scoured the Amish of Lancaster County, Pennsylvania, who refuse to immunize their infants. Given the national rate of autism, Olmsted calculated that there should be 130 autistics among the Amish. He found only four. One had been exposed to high levels of mercury from a power plant. The other three -- including one child adopted from outside the Amish community -- had received their vaccines. --- **-Deadly Immunity** By ROBERT F. KENNEDY JR.

See also: <http://www.generationrescue.org/history.html>

Now 1 in 100 children have autism, 1 in 5 asthma, 1 in 10 dyslexia, 1 in 20 Attention-deficit disorder, Epilepsy 5-8 per 1000, Cerebral Palsy (1 in 400 to 1 in 166), an epidemic of Type 2 diabetes---- -and the number one suspect is vaccination. The Government/Vaccine Industry is going to carry on vaccinating, covering up, and claiming vaccines are safe, until every other child has a vaccine induced disease. Only education and positive action can stop it.

<http://www.whale.to/b/hoax1.html>

Many of us have been vaccinated, and have vaccinated our children. I regret that it took me so long to learn the truth about vaccines. If you have, or will have children or grandchildren, what do you plan to do?

Arm yourselves with knowledge! Corporations (government, from city to federal are now incorporated) are driven only by profit!

Join the National Health Federation! Started in 1955, this organization has conducted major campaigns against fluoridation, vaccinations, toxic pesticide spraying, and for mandatory poultry inspection. They have helped chiropractors become licensed in over 40 states, helped gain recognition of acupuncture, and funded lawsuits to protect rights of alternative doctors, chiropractors, and health-food store owners.

Patient Questionnaire

All health care providers obtain entering information from the patient. There are three main components of this:

- 1) Billing information
- 2) Presenting condition
- 3) Patient History

This has great practical utility and gathers the necessary information efficiently. Perhaps of even greater importance is the protection this information can give the patient from potential harm. Appropriate questions in the Presenting and History portion can alert you to potential danger of injury or even death to the patient by otherwise perfectly safe procedures.

What is presented here is designed to make you think about the third item on this list.

Does your Questionnaire obtain information about previous or existing liver, kidney, stomach, gall bladder or circulatory problems? Did you know that a B-12 shot can kill in certain cases? Can any of your therapy devices stop a pacemaker? To stimulate your thinking, we have placed a suggested list of questions on our web site. You can download it in .pdf format if you would like to use it. There is also a complete Questionnaire. <http://www.stellarchiro.com/> (Click on Resources.)

Backups
